WINDOW INSERTS THAT SAVE YOU MONEY AND HELP YOUR COMMUNITY

NRPC and local volunteers are organizing our second annual WindowDressers Community Build so residents in Franklin and Grand Isle Counties can get affordable, insulating window inserts for their homes while providing free inserts to low-income families in the region. Window Dressers is a New England based non profit that helps communities build affordable and effective window inserts using a volunteer driven process. They even offer up to 10 free inserts to low-income households! The inserts are highly effective, saving an average of 1 gallon of heating fuel per square foot of window covered every year and taking less than two years to pay for themselves. So how can you get inserts?

Step 1: Go to windowdressers.org and fill out the order form

Step 2: In the spring, volunteers will measure your windows and give you an exact price (inserts average \$44 but depend on size and ability to pay)

Step 3: Sign up for a couple shifts at the Community Build happening in fall 2023, open to all ability and mobility levels

Step 4: Take home your new window inserts and enjoy lower heating bills and a warmer home!
