

Lavin Property Community Walk

Self-guided Walk

As you walk along the trail, look for stakes in the ground. The number on the stake will tell you where you are on the map.

1. Looking west from here, you can see the Congregational Church. The Lavin Property has a small extension that connects to South Street right across from the Church.
2. This is the start of the forested part of the Property. Follow the trail to keep going.
3. A track leads off the trail to test pits from a 2025 wastewater study. That part of the Property will probably be used for community wastewater disposal.
4. Here you can see two different forest stands on each side of the trail. The stand to the west is younger, and the stand to the east is older. Both have different types of trees.
5. The back of the Rec Path parcel connects up to the Lavin Property here. You can take the trail that splits off to the Rec Path, or follow the power lines east to Stop #6.
6. This is the edge of a large wetlands complex. You'll have to turn around here!
